

Introduction to Weirwood: a new competitive market analysis tool using Vortexa data

WEIRWOOD

Weirwood: Executive Summary

What is it?

➤ Weirwood is a marine movement intelligence dashboard that turns Vortexa waterborne cargo data into a view of IMTT's vessel movement market share across our five deepwater markets: LMR, New York Harbor, St. Lawrence, San Francisco Bay, and Virginia

- ❑ **A more refined view of IMTT vs direct shipping competitors:** Focused specifically all imports and exports from IMTT's main ports of operation: LMR, New York Harbor, St. Lawrence River, San Francisco Bay and Virginia using Vortexa data going back to 2022
- ❑ **A better tool for uncovering unnoticed trends:** Meant to help uncover movement patterns that would otherwise be difficult to discern with Vortexa or pivot tables alone
- ❑ **A complement to Vortexa / Pivot Tables (not a replacement):** Not a tool to dig into known/obvious trends. It exists to flag potentially unrecognized trends and anomalies in our own backyard

WEIRWOOD

Advantages vs Vortexa as a Competitive Market Trend Discovery Tool

- No views on Vortexa that allow you to look at terminal's shares of a given product import/export market vs other terminals in the given market in a given period of time
- Vortexa data can be overwhelming with 40+ data filters per movement listed; Weirwood is distilled down to the most critical and intuitive filters
- Weirwood designed to be more seamless, intuitive for anyone in commercial / corp dev to use
- Unlimited users on Weirwood: operates on an HTML link

Advantages vs Pivot Tables as a Competitive Market Trend Discovery Tool

- Filters in Weirwood are distilled down to only the necessary filters for understanding potential competitive market trends and opportunities
- For the ad hoc question, there is a pivot tab built inside Weirwood built to be more user-friendly than excel's pivot tables (still in development, feedback welcome)
- Much easier to move rapidly between views and to find your way back to a previous view without rebuilding it
- More aesthetic layout

Weaknesses

- Vortexa will be a better tool for pulling specific shipping data if you know exactly what you are looking for
 - ❑ E.g. Ethanol exported out of Texas over time (and other known market trends), tracking specific ships, general macro data beyond IMTT competitive markets
- Pivot tables will be advantaged at analyzing specific data sets
- All known weaknesses associated with Vortexa

Pivot

The control bar and the six-view switcher: Regions, Terminals, Refineries, Time detail, Annualize, Timeline, Units, Categories, Products, Settings. This strip stays put at every level.

Level 1: Dashboard / Network View

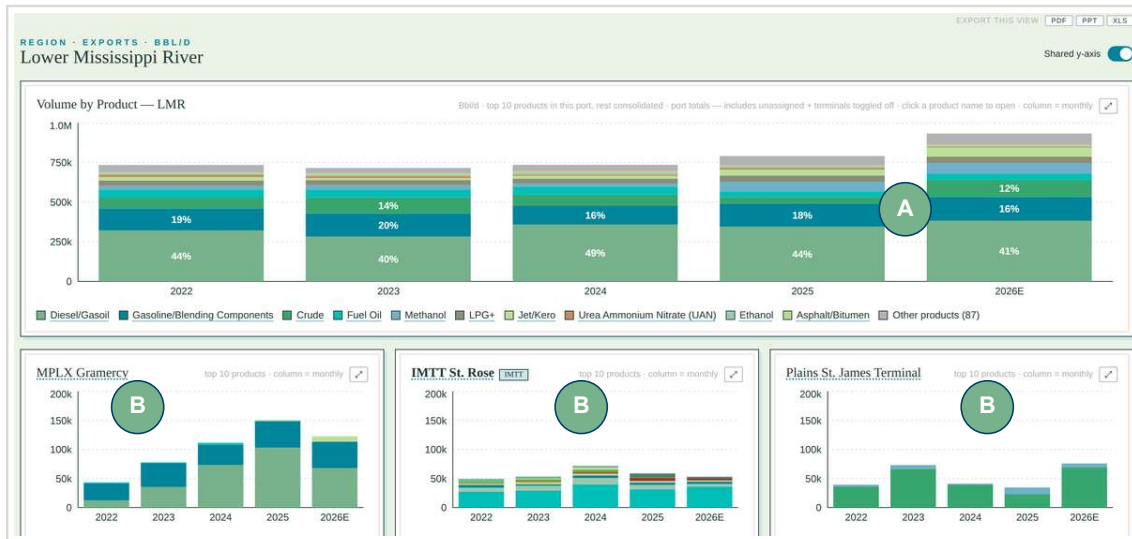

- **Percent labels**
Each band shows its share of the period
- **Legend names are links**
Click a region to open it; click a product to see it across every terminal
- **Click a column**
Drills that year down to its monthly detail
- **Export this view**
PDF, PPT or XLS of exactly what's on screen

Where to go next

Click a region → Region (L2) · click a terminal → Terminal (L3) · click a product name or legend swatch → that product across every terminal (L3B). The breadcrumb walks you back up, and the Target Markets / Trends / Pivot lenses are one click away from anywhere

Levels 2 & 3: Drilling into a Region

See a terminal's market share of product movement over given period

A

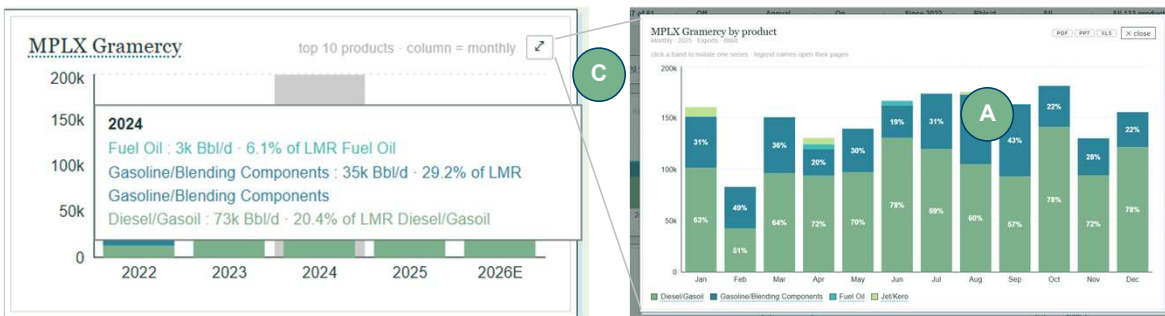

Directly Compare Terminals in a Region

B

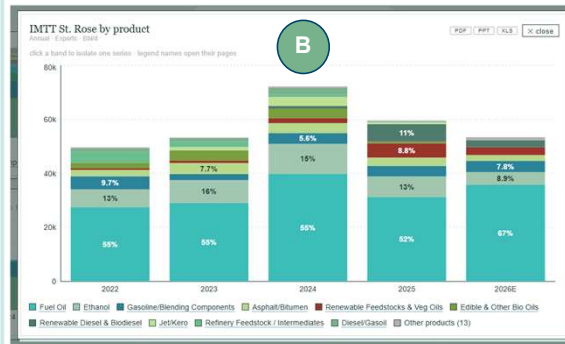

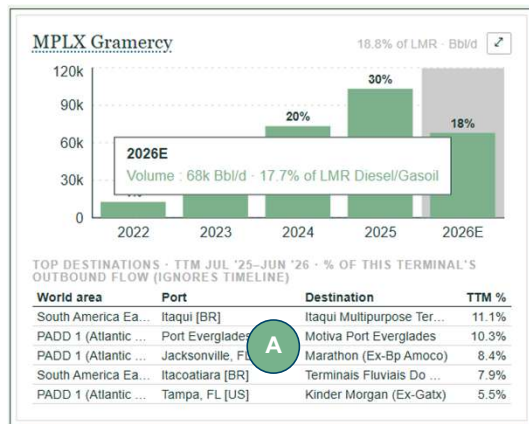

Expand View to get a detailed look at market share over time for a given terminal

C

Region (L2) — the region's product mix on top, then a tile per terminal. IMTT terminals carry an IMTT badge.

Levels 2 & 3: Drilling into a Region

Movers — share shifts - Q1-Q2 '26 vs Q3-Q4 '25

share of terminal-assigned volume of each product in its region - fixed trailing windows (ignores Timeline)

Terminal	Product	Q3-Q4 '25	Q1-Q2 '26	Δ	Recent Bbl
MPLX Gramercy	Jet/Kero	1.2%	16.4%	+15.2 pp	1.7M
Plains St. James Terminal	Crude	50.0%	63.8%	+13.7 pp	12.7M
IMTT Gelsmar (BASF) - IMTT	Methanol	77.5%	90.2%	+12.6 pp	11.0M
BWV Gretna	Styrene	12.3%	17.0%	+4.6 pp	234k
Genesis Baton Rouge (Port Allen)	Fuel Oil	0.0%	4.1%	+4.1 pp	285k
CF Industries Donaldsonville	Urea Ammonium Nitrate (UAN)	80.2%	78.5%	-1.8 pp	649k
IMTT St. Rose - IMTT	Renewable Diesel & Biodiesel	58.4%	22.0%	-36.4 pp	466k
IMTT St. Rose - IMTT	Asphalt/Bitumen	47.4%	30.0%	-17.3 pp	393k
Chevron Empire Terminal	Crude	42.8%	29.4%	-13.5 pp	5.8M
MPLX Gramercy	Diesel/Gasoil	31.1%	17.7%	-13.4 pp	12.4M
CF Industries Donaldsonville	LPG+	51.9%	42.1%	-9.8 pp	3.1M
IMTT St. Rose - IMTT	Ethanol	79.6%	73.1%	-6.5 pp	864k

TTM Destination Tables

Top-5 counterparties by world area, port and terminal, each with its TTM share

Volume by Product

Top-10 products stacked, the rest rolled into "Other". Hover for per-period share

Competitor Scorecard

Ranks every terminal by share of terminal-assigned volume. Toggles hide a competitor and persist as you drill

Level 4: Trends (Take with a grain of salt)

Every flagged product flow in every region, scanned on a fixed TTM (Jul '25 – Jun '26) vs prior-12-month window

IMTT TREND SCAN - EXPORTS - TTM JUL '25-JUN '26 VS PRIOR 12M

Top signals by target market

Heatmap screen of every product flow — volume trend vs IMTT participation — respects Direction + Products/Categories filters — ignores Timeline & terminal toggles

LMR (10) NY Harbor (3) St. Lawrence (8) SF Bay (5) Virginia (1)

Top 10 signals - Lower Mississippi River

click a product to open it in this market - ranked by affected volume

1	◆ Diesel/Gasoil	Major flow, IMTT effectively absent	WATCH
IMTT at 0.01% of a 1.95 MM Bbl TTM flow - market TTM 1.96 MM Bbl (prior 135.1M) - IMTT TTM 205k Bbl			
2	◆ Crude	Major flow, IMTT effectively absent	WATCH
IMTT at 0.0% of a 30.5M Bbl TTM flow - market TTM 30.5M Bbl (prior 15.4M) - IMTT TTM 0 Bbl			
3	◆ LPG+	Major flow, IMTT effectively absent	WATCH
IMTT at 0.0% of a 15.2M Bbl TTM flow - market TTM 15.2M Bbl (prior 13.2M) - IMTT TTM 0 Bbl			
4	▼ Ethanol	Market down 41%, IMTT exposed	RISK
IMTT holds 78.4% of a shrinking flow - market TTM 2.5M Bbl (prior 4.3M) - IMTT TTM 2.0M Bbl			
5	▼ Jet/Kero	Market up 63%, IMTT share slipping	RISK
Share 9.2% — 1.4% while the flow grew - market TTM 17.0M Bbl (prior 10.5M) - IMTT TTM 239k Bbl			
6	▲ Methanol	IMTT growing ahead of the market	POSITIVE
Share 16.7% — 83.9% in a flow up 65% - market TTM 24.7M Bbl (prior 13.4M) - IMTT TTM 20.7M Bbl			
7	▼ Renewable Feedstocks & Veg Oils	Market down 57%, IMTT exposed	RISK
IMTT holds 61.8% of a shrinking flow - market TTM 1.7M Bbl (prior 4.0M) - IMTT TTM 1.1M Bbl			
8	◆ Caustic Soda	Major flow, IMTT effectively absent	WATCH
IMTT at 0.1% of a 5.2M Bbl TTM flow - market TTM 5.2M Bbl (prior 3.6M) - IMTT TTM 6k Bbl			
9	▲ Renewable Diesel & Biodiesel	IMTT growing ahead of the market	POSITIVE
Share 25.7% — 45.2% in a flow up 115% - market TTM 5.2M Bbl (prior 2.4M) - IMTT TTM 2.3M Bbl			
10	▼ Asphalt/Bitumen	Market down 36%, IMTT exposed	RISK
IMTT holds 20.2% of a shrinking flow - market TTM 2.3M Bbl (prior 3.4M) - IMTT TTM 805k Bbl			

Respects Direction and the Products / Categories filters; ignores Timeline and terminal toggles. Flows below the volume floor are dropped.

- **Market up, IMTT share slipping** — the flow grew while our cut fell
- **Major flow, IMTT absent** — a large flow where IMTT is under ~1%
- **New flow emerged in TTM** — volume from a near-standing start
- **Flow IMTT served has stopped** — a served flow that dried up
- **Market down, IMTT exposed** — we hold share of a shrinking flow
- **IMTT growing ahead of the market** — share gained in a rising flow
